ROUND-2 USER TEST TRANSCRIPTS & RESULTS SHEET: SIP PASSBOOK (9 NOV, v4)

Quotes from interview notes, lightly edited | 4 Testers (P03, P04, P02, P06) | Demo SIP: sippassbook.vercel.app

Tester P03 (P03 — 26F, Customer Success Manager)

SIP Status: Active since Feb 2026 (5th of every month) | Stance: Agreeable (Loves Passbook & Delivery Tracker)

Story Context: Started her first job in Jan 2026 and first SIP on 5 Feb 2026. Panicked in June when her bank debited the SIP money but Groww showed 'processing' for 2-3 working days with no units visible. Checks individual transactions after every bank SMS.

1. Consent and baseline (4 min)

Consent: "Yeah, sure, you can take notes and record the audio. As long as my real account screen isn't being recorded, I'm fine with it."

[Baseline success: Yes (25 sec)]

1. Open your Groww app. Find last month's SIP instalment. Is it fully done?: "Okay, let me open Mutual Funds, then my SIP... Sometimes I hesitate between the general fund page and my own investment page, so let me tap into Transactions to be sure. My date is the 5th. Here's October 5th—it says completed, the amount matches my bank debit, and units are allotted. Actually, my November 5th one also just completed after the weekend."

2. How sure are you about that, from 1 to 5?: "5 now that it says completed. If you'd asked me on the 6th while it just said 'in progress,' it would have been a 3."

3. Where would you normally check this?: "Always the bank SMS first because that comes automatically on the 5th. Then two or three days later I open Groww and check the transaction entry—ever since that June delay, I don't just look at the total balance."

2. Tasks in the SIP Passbook (12 min)

[First tap: Tapped 'Open my passbook' button -> tapped November card. Result: Yes | Time: 19 sec]

T1. Your bank's SMS says ₹2,000 left your account for your November SIP. Where is that money now?: "Looking at the November tracker right here: the bank debit was picked up on 4 Nov at 09:12, and the order was handed to the fund on 5 Nov at 11:40. Right now the units say 'On the way'—checked on 6 Nov at 10:00, so they haven't been delivered to my name yet."

- **T1 follow-up (Is that normal? When would you start to worry?):** "Yeah, it says right below that with Groww AutoPay, units are expected two working days after the SIP date (T+2), and up to 4 working days is normal. Honestly, if I had seen this in June, I wouldn't have panicked. I'd only start worrying if it went past 4 working days, and contact support after 6 working days."
- **T1 & follow-up Score:** Success: Yes / Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Yes | Time: 24 sec]

T2. Was any money taken in May? Can you still pay it?: "Let me scroll down to May... No, nothing was taken. It says the debit failed on 4 May at 09:12 because of insufficient balance. And no, I can't pay it now—it says Pay Now stays open for 2 working days, and that window has closed."

- **T2 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Yes | Time: 22 sec]

T3. Where did your September money go?: "Scrolling to September... Okay, the ₹2,000 was picked up from the bank on 4 Sep at 09:00, but on 7 Sep at 11:00 the order wasn't accepted. So the full ₹2,000 was returned to the bank on 12 Sep at 14:00."

- **T3 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No (I'd just check my bank statement for 12 Sep to confirm)

[Result: Useful (Yes) | Time: 42 sec]

T4. Ask Sensecheck one question you'd really have about your own SIP: "I'm asking why my total value is lower than what I put in even when every payment succeeded... It gave me a Standard answer badge and explained that each monthly instalment buys units at that month's price, so if the market dips slightly, your current value sits below your invested amount. One tiny thing that confused me for a second when I looked at the processing help here is that Sensecheck says '5-6 business days' while the tracker says T+2 / 4 working days—so I wasn't 100% sure which day count is the strict rule."

- **Exact words typed:** "Why is my current value less than what I invested even though all my payments went through?"
- **Badge:** Standard answer
- **T4 Score:** Useful: Yes | Confidence: 4 / 5 | Contact support?: No

[Result: Yes | Time: 18 sec]

T5. Your salary moves to a new bank next month. What can you do?: "I'll tap 'Next steps' at the bottom... Right here, there's a card for 'Change the AutoPay bank' and I can tap 'Read the rule' to see what to do before my next date."

- **T5 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

3. The passbook and the delivery tracker: reactions (6 min)

On the Passbook:

1. Point at the top card: 'What does this card tell you?': "It shows my overall summary—that I've put in ₹16,000 so far, right now it's worth ₹15,534 which is down ₹466 (-2.91%), that I have 158.513 units in total, and that my last fully confirmed payment was 5 Oct 2026."

2. Point at November's three steps: 'What do these three steps mean to you?': "It breaks down that scary gap after the bank SMS. First the money leaves my bank, second Groww hands the order to the mutual fund company, and third the units actually get delivered to my account."

3. 'What does this remind you of, if anything?': "Swiggy or Amazon! Like tracking an online order from 'Picked up' to 'Delivered.'"

4. Point at the words: 'Picked up, handed to the fund, delivered, with the bank's words above them. Which words would you rather read?': "Definitely 'Picked up, handed to the fund, delivered.' Banking words make me feel like something might be stuck, whereas delivery words immediately tell me my money is just on the way."

5. Have them scroll through the months: 'Seeing every month like this, what do you notice?': "You can see your whole streak in one scroll! I can immediately spot which months went smoothly, that May failed without taking money, and that September came back to the bank."

6. 'When would you open this, if it were in your Groww app?': "Right after I get my bank debit SMS on the 5th, and then a couple of days later to see that the units were delivered."

On November's page:

1. Point at 'What happened, step by step': 'Each step shows where the information came from and when. Does that change how much you trust it?': "Yes, a lot. When Groww just says 'Processing,' it feels like a generic screen. Seeing '4 Nov, 09:12' from the bank and '5 Nov, 11:40' handed to the fund makes me trust that it tracked my exact payment."

2. Point at 'Units still not here after T+2?': 'If your units were late, what would you do after reading this?': "I'd wait out the 4 working days since it says up to 4 working days is normal, instead of messaging customer support on day two like I did in June. I'd only raise a ticket after 6 working days."

3. Point at Sensecheck's Checked badge: 'What does Checked mean to you?': "It means the answer was checked against my actual passbook data and Groww's rules, not just random AI guessing."

Last: 'Of everything you saw, which one thing would you most want in your own Groww app?': "The 3-step delivery tracker on each month's payment—Picked up, Handed to the fund, Delivered. That would have saved me so much stress in June."

4. Closing questions (4 min)

1. Did anything here push you to keep going with your SIP, or to stop?: "No, nothing felt pushy. It just shows what happened to my money each month."

2. Did anything read like advice on what to do with your money?: "No, not at all. It doesn't tell me which fund to buy or how much to invest."

3. Would you trust the Sensecheck answer you got? Why, or why not?: "Yes, because it didn't make fake promises about returns—it just explained how monthly units work in plain words."

4. Next time an instalment looks stuck, what would you do?: "Check which of the three delivery steps it's on, check the timestamp, and wait up to 4 working days—and only contact support after 6 working days."

5. Compared with your own app, what did this make easier, if anything? What was missing?: "It made seeing where my money is between the bank debit and unit allotment way easier. Nothing really felt missing for checking my SIP."

6. Say Groww sent you a message right after your bank's SMS, saying where the money is, with a link to that month. What would you do with it?: "I'd tap the link once, see that Groww picked up the debit and units are expected in T+2, feel relieved, and close it."

Memories and Ask a friend (Only if found on their own)

Did tester find 'Add a memory' or 'Ask a friend' on their own?: "Yes — while scrolling back up from May during Task 3, she noticed 'Ask a friend about this' on the May card and tapped it."

- **What do you make of that?:** "Oh, nice—it writes out the question and status without showing my rupee balance or account details! I always ask my college friend when something looks confusing in Groww."
- **Would you use it? When?:** "Yes, definitely! In June when my payment was processing, or in March when my return turned red, I would have tapped this to send to my college friend on WhatsApp."

Tester P04 (P04 — 26M, IT Engineer)

SIP Status: Lapsed in Sep & Oct 2026 (Last paid 10 Aug 2026) | Stance: Slightly Confused on Details, Likes Passbook

Story Context: Started SIP in Nov 2025 (10th of the month). Switched jobs in Aug 2026; salary moved to a new bank account in Sep 2026. Missed Sep & Oct instalments because the old AutoPay mandate wasn't updated, and he assumed the SIP was still running because his portfolio value kept moving.

1. Consent and baseline (4 min)

Consent: "Yeah, go ahead. Notes and audio recording are fine."

[Baseline success: Yes, after initial wrong screen (39 sec)]

1. Open your Groww app. Find last month's SIP instalment. Is it fully done?: "Let me open my portfolio and tap the fund... Well, the fund still has a total value moving up and down, so normally I assumed it was running. Wait, let me go into the SIP section and open the payment entries... Okay, October failed, and September failed too after my salary bank account changed in August. So my last completed one was actually 10 August."

2. How sure are you about that, from 1 to 5?: "4—now that I'm inside the payment list I can see August was the last success, though it's still a bit confusing why the main SIP screen still shows 'Next due: 10 Nov' as if nothing broke."

3. Where would you normally check this?: "Usually just the bank SMS. When my old account didn't have the new salary, I got a failed-payment message in September while I was busy joining my new team, dismissed it to fix later, and forgot."

2. Tasks in the SIP Passbook (12 min)

[First tap: Read off Home screen, then tapped November card. Result: Yes | Time: 28 sec]

T1. Your bank's SMS says ₹2,000 left your account for your November SIP. Where is that money now?: "Looking at the November tracker on the Home screen: the bank debit was picked up on 4 Nov at 09:12, and the order was handed to the fund on 5 Nov at 11:40. Right now the units are 'On the way'—checked on 6 Nov at 10:00. Wait, one small thing that confused me for a second is why the bank debit says 4 Nov when it's the '5 Nov 2026 instalment'—oh, okay, AutoPay picks it up a day early or on the mandate schedule. Anyway, the money is with the fund and units aren't delivered yet."

- **T1 follow-up (Is that normal? When would you start to worry?):** "Yeah, it says T+2 working days is expected with Groww AutoPay, and up to 4 working days is normal. I'd start to worry after 4 working days, and contact support after 6 working days."
- **T1 & follow-up Score:** Success: Yes / Yes | Confidence: 4 / 5 | Contact support?: No

[Result: Yes | Time: 31 sec]

T2. Was any money taken in May? Can you still pay it?: "Going to Passbook and scrolling down to May... No money was taken, it says debit failed on 4 May at 09:12 because of insufficient balance. Can I still pay it? Let me see—it mentions a 'Pay Now' window stays open for 2 working days and that window has closed. At first I looked for a grayed-out 'Pay Now' button to be sure, so I'm mostly sure you can't pay May anymore, you just wait for the next month."

- **T2 Score:** Success: Yes | Confidence: 4 / 5 | Contact support?: No

[Result: Yes | Time: 27 sec]

T3. Where did your September money go?: "In September, ₹2,000 was picked up on 4 Sep at 09:00, then on 7 Sep at 11:00 the order wasn't accepted, and on 12 Sep at 14:00 the full ₹2,000 was returned to the bank. It doesn't really say *why* the fund didn't accept the order on 7 Sep, which I'd be a little curious about, though I can clearly see the money came back to my bank on 12 Sep."

- **T3 Score:** Success: Yes | Confidence: 4 / 5 | Contact support?: No (since the money is back in the bank)

[Result: Useful (Yes) | Time: 44 sec]

T4. Ask Sensecheck one question you'd really have about your own SIP: "I'm typing a question about my failed payments after switching salary accounts... Okay, it gave a Checked badge and explained how the AutoPay mandate is tied to my old bank account and that I need to update the bank mandate rather than starting a brand-new SIP. It tells me the rule clearly, though I initially thought Sensecheck might have a direct button inside the answer to change my bank right there."

- **Exact words typed:** "My last two SIP payments failed because my salary moved to a new bank. How do I change the bank account without starting a second SIP?"
- **Badge:** Checked
- **T4 Score:** Useful: Yes | Confidence: 4 / 5 | Contact support?: No

[Result: Yes (after checking Passbook first) | Time: 26 sec]

T5. Your salary moves to a new bank next month. What can you do?: "Let me check the Passbook first... not there. Oh, let me tap 'Next steps' at the bottom. Right here—'Change the AutoPay bank' card, and tap 'Read the rule.'"

- **T5 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

3. The passbook and the delivery tracker: reactions (6 min)

On the Passbook:

1. Point at the top card: 'What does this card tell you?': "It shows my current value is ₹15,534 out of ₹16,000 invested—so down ₹466 (-2.91%)—with 158.513 units, and it says 'last fully confirmed 5 Oct 2026.' At first I had to think whether ₹16,000 includes the ₹2,000 from November that's still on the way, or just up to October—seeing 'last fully confirmed 5 Oct' helps clarify that."

2. Point at November's three steps: 'What do these three steps mean to you?': "It shows the three stages of the payment: money debited from the bank, order sent to the mutual fund, and units credited to my account."

3. 'What does this remind you of, if anything?': "Tracking a parcel on Flipkart or Amazon—where you see 'Picked up,' 'In transit,' and 'Delivered.'"

4. Point at the words: 'Picked up, handed to the fund, delivered, with the bank's words above them. Which words would you rather read?': "Definitely 'Picked up, handed to the fund, delivered.' It's much easier to read at a glance than banking terms, though having the bank words small above them is useful if you're checking your statement."

5. Have them scroll through the months: 'Seeing every month like this, what do you notice?': "You immediately notice the missed or failed months! Like May and September stand out right away. In Groww, because my old August units kept moving with the market, I didn't even realize September and October had failed until I dug into the history. Here, you can't miss it."

6. 'When would you open this, if it were in your Groww app?': "Around the 10th of the month when my SIP goes out, or right away if I got a failed payment message."

On November's page:

1. Point at 'What happened, step by step': 'Each step shows where the information came from and when. Does that change how much you trust it?': "Yeah, seeing the source and exact time makes it look like real system logs rather than a dummy status screen."

2. Point at 'Units still not here after T+2?': 'If your units were late, what would you do after reading this?': "I'd wait up to 4 working days since it says that's normal, and only contact support if 6 working days have passed."

3. Point at Sensecheck's Checked badge: 'What does Checked mean to you?': "At first I wasn't sure if 'Checked' meant a human support agent checked it or if the system checked it against my passbook—reading the note, I get that it's verified against the app rules and my passbook data."

Last: 'Of everything you saw, which one thing would you most want in your own Groww app?': "The monthly passbook scroll with that 'last fully confirmed' date at the top and failed months clearly highlighted—that would have made me fix my bank account back in September."

4. Closing questions (4 min)

1. Did anything here push you to keep going with your SIP, or to stop?: "No, it didn't push me either way. It just shows what happened each month."

2. Did anything read like advice on what to do with your money?: "No, nothing read like investment advice."

3. Would you trust the Sensecheck answer you got? Why, or why not?: "Yes, it gave me the straightforward rule for changing the AutoPay bank without any sales pitch."

4. Next time an instalment looks stuck, what would you do?: "Open that month in the passbook, check the 3 steps and timestamps, and wait up to 4 working days (or 6 before contacting support)."

5. Compared with your own app, what did this make easier, if anything? What was missing?: "Way easier to tell the difference between 'my old units are moving in value' and 'this month's SIP payment actually went through.' What was slightly missing for me was a direct link right on the failed May card to 'Change AutoPay bank' so I wouldn't have to look in the bottom bar."

6. Say Groww sent you a message right after your bank's SMS, saying where the money is, with a link to that month. What would you do with it?: "If it's a normal debit, I'd just glance at it. If a payment failed like mine did in September and it linked straight to that month in the passbook, I'd open it and fix the bank account."

Memories and Ask a friend (Only if found on their own)

Did tester find 'Add a memory' or 'Ask a friend' on their own?: "No — did not notice or tap either feature unprompted during the session (not asked per protocol)."

Tester P02 (P02 — 25M, Data Analyst)

SIP Status: Active since 6 May 2026 (6th of every month) | Stance: Agreeable (Likes Audit Trail & Sensecheck)

Story Context: Started his SIP on 6 May 2026 right after his first appraisal. No payment failures, but nearly stopped in July because his personal SIP return looked flat compared to the historical return chart on the fund page. Likes figuring things out himself.

1. Consent and baseline (4 min)

Consent: "Sure, notes and audio are completely fine."

[Baseline success: Yes (26 sec)]

1. Open your Groww app. Find last month's SIP instalment. Is it fully done?: "I'll go into Mutual Funds, then the SIP section... Well, seeing the SIP there only tells me I've set one up. Let me open Transactions. My date is the 6th. October 6th is 100% done—money taken, order completed, units allotted. November 6th was this past Friday, so the money left my bank on the 6th, and with the weekend in between it's just finishing up."

2. How sure are you about that, from 1 to 5?: "5 for October. For the November 6th one, 4—just because Groww's transaction list doesn't explicitly state which day the units will show up when a weekend is in the middle."

3. Where would you normally check this?: "Usually I see the bank SMS on the 6th, and then a few days later when I open Groww to look at my total value, I assume it went in. I don't normally open the transactions list unless something looks off."

2. Tasks in the SIP Passbook (12 min)

[First tap: Tapped 'Passbook' in bottom nav -> viewed November. Result: Yes | Time: 16 sec]

T1. Your bank's SMS says ₹2,000 left your account for your November SIP. Where is that money now?: "I can see it right here: Bank debit was picked up on 4 Nov at 09:12, the order was handed to the fund on 5 Nov at 11:40, and the units are 'On the way' as of the check on 6 Nov at 10:00. So the fund house has the order, units just aren't delivered to my name yet."

- **T1 follow-up (Is that normal? When would you start to worry?):** "Completely normal. The rule right there says T+2 working days with Groww AutoPay, and up to 4 working days is normal. I'd only start to worry after 4 working days, and contact support after 6 working days."
- **T1 & follow-up Score:** Success: Yes / Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Yes | Time: 19 sec]

T2. Was any money taken in May? Can you still pay it?: "Scrolling down to May... No, nothing was taken. The debit failed on 4 May at 09:12 because of insufficient balance. And no, you can't pay it now—Pay Now stays open for 2 working days, and that window has closed."

- **T2 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Yes | Time: 17 sec]

T3. Where did your September money go?: "Looking at September... It was picked up from the bank on 4 Sep at 09:00, the order wasn't accepted on 7 Sep at 11:00, and the full ₹2,000 was returned to the bank on 12 Sep at 14:00."

- **T3 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Useful (Yes) | Time: 39 sec]

T4. Ask Sensecheck one question you'd really have about your own SIP: "I'm asking the exact question I had in July when I compared my return to the fund page chart... It gave a Standard answer badge. It breaks down that a fund's 1-year chart measures a single lump sum over 12 months, whereas my SIP money went in on different monthly dates at different NAVs. Also, when I clicked on the processing time question in Sensecheck, I noticed it quotes Groww's 'up to 4 working days' or '5-6 business days' while the tracker says T+2—not a big deal, just noticed the two different numbers from Groww's help docs."

- **Exact words typed:** "Why does my SIP return (-2.91% on the passbook) look so different from the fund's 1-year historical return chart?"

- **Badge:** Standard answer
- **T4 Score:** Useful: Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Yes | Time: 14 sec]

T5. Your salary moves to a new bank next month. What can you do?: "Go to 'Next steps' in the bottom bar, find the 'Change the AutoPay bank' card, and click 'Read the rule.'"

- **T5 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

3. The passbook and the delivery tracker: reactions (6 min)

On the Passbook:

1. Point at the top card: 'What does this card tell you?': "It's the overall summary: ₹16,000 total invested across 8 confirmed months, currently worth ₹15,534 (-₹466 or -2.91%), holding 158.513 units, with the last fully confirmed one on 5 Oct 2026."

2. Point at November's three steps: 'What do these three steps mean to you?': "It shows the handoffs—first the bank debits the money, then the order reaches the fund house, and then the fund house allots the units."

3. 'What does this remind you of, if anything?': "Online delivery tracking—like tracking a courier or an Amazon order from dispatch to delivery."

4. Point at the words: 'Picked up, handed to the fund, delivered, with the bank's words above them. Which words would you rather read?': "I like seeing both together, but 'Picked up, handed to the fund, delivered' is way better as the main text. When you're new, banking terms make you think something went wrong, whereas delivery words make the 2-day wait feel normal."

5. Have them scroll through the months: 'Seeing every month like this, what do you notice?': "It's really clean. When my colleague convinced me to start a SIP in April, he showed me his contribution history, not just his profit figure. Scrolling through this feels just like that—you see every month's contribution building up your units in one place."

6. 'When would you open this, if it were in your Groww app?': "Once a month around the 7th or 8th, a couple of days after my 6th debit, just to see the new month's units added."

On November's page:

1. Point at 'What happened, step by step': 'Each step shows where the information came from and when. Does that change how much you trust it?': "Definitely. I work with data, so seeing the exact timestamp and source for every step makes it feel like a real audit trail rather than a generic status label."

2. Point at 'Units still not here after T+2?': 'If your units were late, what would you do after reading this?': "I'd sit tight until 4 working days have passed, and only contact support if it hits 6 working days."

3. Point at Sensecheck's Checked badge: 'What does Checked mean to you?': "That the explanation is verified against the platform's rules and the actual numbers in my passbook."

Last: 'Of everything you saw, which one thing would you most want in your own Groww app?': "The monthly passbook scroll combined with Sensecheck—because in July when I was confused about my returns vs the fund chart, I had to search Google and text my colleague."

4. Closing questions (4 min)

1. Did anything here push you to keep going with your SIP, or to stop?: "No, it's completely neutral. It just gives you clarity on how your money is moving."

2. Did anything read like advice on what to do with your money?: "No, it never tells you what to buy, sell, or change."

3. Would you trust the Sensecheck answer you got? Why, or why not?: "Yes, because the math it explained—staggered monthly purchase dates vs a single 1-year chart—is objective and accurate."

4. Next time an instalment looks stuck, what would you do?: "Check the 3-step tracker on that month's card, verify if we're still within the 4 working days normal window, and wait until day 6 before contacting support."

5. Compared with your own app, what did this make easier, if anything? What was missing?: "In Groww, checking that you have a SIP set up and checking whether this month's payment finished are in two separate places. Here, one scroll shows the whole timeline. Nothing felt missing for tracking the SIP."

6. Say Groww sent you a message right after your bank's SMS, saying where the money is, with a link to that month. What would you do with it?: "In my first two months when I was checking almost daily, I would've tapped that link immediately. Now I'd just read the notification text and know it's on track."

Memories and Ask a friend (Only if found on their own)

Did tester find 'Add a memory' or 'Ask a friend' on their own?: "Yes — while scrolling through the Passbook in Section 3 (Question 5), he noticed 'Ask a friend about this' on the May card and tapped it."

- **What do you make of that?:** "That's actually super practical—it copies the question and status without sharing your rupee balance. In July I literally typed out the wording from Groww manually to send to my colleague at work because I didn't want to screenshot my balance."
- **Would you use it? When?:** "Yes, if a payment status or return number confused me, I'd use 'Ask a friend' to send it to my colleague. 'Add a memory' I probably wouldn't use much, maybe just once on month one."

Tester P06 (P06 — 28M, Product Manager)

SIP Status: Cancelled on 15 Sep 2026 (4 instalments paid) | Stance: Neutral / Pragmatic

Story Context: Finance grad and stock trader. Started his first MF SIP on 5 June 2026, completed 4 monthly payments through 5 Sep, then cancelled on 15 Sep because early returns looked disappointing compared to peers and historical charts. Existing units remain invested; already understands T+2 settlement.

1. Consent and baseline (4 min)

Consent: "Yep, all good. Take notes and record away."

[Baseline success: Yes (20 sec)]

1. Open your Groww app. Find last month's SIP instalment. Is it fully done?: "Since I cancelled my SIP on 15 September, there is no October or November payment. Let me open the cancelled SIP and check the transaction history... Here's the last one I paid: 5 September. Bank debit happened, order completed, and units were allotted."

2. How sure are you about that, from 1 to 5?: "5. I checked in October too just to make sure the cancellation had stopped the auto-debit."

3. Where would you normally check this?: "Bank SMS on the 5th first, and then the order status inside Groww a couple of days later. Because I trade stocks and studied finance, I already know how settlement cycles work, so I never worried about the 2-day gap."

2. Tasks in the SIP Passbook (12 min)

[First tap: Tapped directly on the November tracker card on Home. Result: Yes | Time: 15 sec]

T1. Your bank's SMS says ₹2,000 left your account for your November SIP. Where is that money now?: "Looking at the November tracker: Picked up from the bank on 4 Nov at 09:12, handed to the fund on 5 Nov at 11:40, and units are currently 'On the way' (checked 6 Nov at 10:00). So the order is with the fund house awaiting unit allotment."

- **T1 follow-up (Is that normal? When would you start to worry?):** "Yeah, totally normal. The rule states T+2 working days with Groww AutoPay, up to 4 working days is normal, and you contact support after 6 working days."
- **T1 & follow-up Score:** Success: Yes / Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Yes | Time: 17 sec]

T2. Was any money taken in May? Can you still pay it?: "In May, debit failed on 4 May at 09:12 due to insufficient balance, so nothing was taken from the bank. And no, you can't pay it now—Pay Now stays open for 2 working days, and that window has closed."

- **T2 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Yes | Time: 16 sec]

T3. Where did your September money go?: "In September, ₹2,000 was picked up on 4 Sep at 09:00, the order was not accepted on 7 Sep at 11:00, and the full ₹2,000 was returned to the bank on 12 Sep at 14:00."

- **T3 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

[Result: Partly useful for his specific goal (operational yes, fund selection no) | Time: 46 sec]

T4. Ask Sensecheck one question you'd really have about your own SIP: "Let me ask what I actually wanted to know in September—whether I should switch from a flat small-cap fund to a large-cap fund... Okay, it gave a 'Declined' badge and said it doesn't give investment advice or fund recommendations. If I ask a mechanics question instead—like what happens to my existing 158.513 units if I cancel—it gives a 'Checked' answer explaining that existing units stay invested. So it's fine for operational questions, though for my actual problem in September (figuring out if my fund selection was underperforming), it won't answer that by design."

- **Exact words typed:** 1) "Should I switch my flat SIP to a better performing large cap fund?" (Badge: Declined) | 2) "What happens to my existing units when I cancel my SIP?" (Badge: Checked)
- **T4 Score:** Useful: Partly (Yes for mechanics, Declined for fund choice) | Confidence: 5 / 5 | Contact support?: No

[Result: Yes | Time: 15 sec]

T5. Your salary moves to a new bank next month. What can you do?: "Tap 'Next steps' -> 'Change the AutoPay bank' card -> 'Read the rule.'"

- **T5 Score:** Success: Yes | Confidence: 5 / 5 | Contact support?: No

3. The passbook and the delivery tracker: reactions (6 min)

On the Passbook:

1. Point at the top card: 'What does this card tell you?': "It gives the portfolio snapshot: Current value ₹15,534 against ₹16,000 invested, net -₹466 (-2.91%), 158.513 total units, and last fully confirmed 5 Oct 2026."

2. Point at November's three steps: 'What do these three steps mean to you?': "It's the standard settlement flow: bank debit via mandate, order transmission to the AMC, and unit allotment."

3. 'What does this remind you of, if anything?': "An e-commerce delivery tracker, like Amazon or Swiggy."

4. Point at the words: 'Picked up, handed to the fund, delivered, with the bank's words above them. Which words would you rather read?': "Honestly, I'm neutral—since I'm from a finance background, I'm fine with the bank/order terms, though I can see why 'Picked up, handed to the fund, delivered' is friendlier for a first-time investor. Having both doesn't hurt."

5. Have them scroll through the months: 'Seeing every month like this, what do you notice?': "The single-scroll Passbook is definitely cleaner than Groww's transaction list because you see the whole monthly habit and unit accumulation in one place, and tapping back keeps your scroll spot. For me personally, payment tracking wasn't why I stopped my SIP, but as a passbook view it's well organized."

6. 'When would you open this, if it were in your Groww app?': "Probably just once a month or every couple of months to check how many units I've accumulated, rather than tracking individual debits."

On November's page:

1. Point at 'What happened, step by step': 'Each step shows where the information came from and when. Does that change how much you trust it?': "It's good hygiene to show timestamps and sources—I already trusted that Groww wasn't stealing my money during the T+2 window, so it doesn't drastically change my trust, but it's transparent."

2. Point at 'Units still not here after T+2?': 'If your units were late, what would you do after reading this?': "Wait up to 4 working days since that's normal, and only contact support after 6 working days."

3. Point at Sensecheck's Checked badge: 'What does Checked mean to you?': "It means the answer is pulled from verified rules and my account data rather than an open-ended AI guess."

Last: 'Of everything you saw, which one thing would you most want in your own Groww app?': "The single-scroll Passbook view showing my active vs stopped monthly habit and the 'Next steps' options (like pausing or lowering instead of cancelling outright)."

4. Closing questions (4 min)

1. Did anything here push you to keep going with your SIP, or to stop?: "No, it didn't push me either way. It's strictly factual."

2. Did anything read like advice on what to do with your money?: "No—when I asked whether to switch funds, it explicitly declined to advise me."

3. Would you trust the Sensecheck answer you got? Why, or why not?: "I trust it for operational rules because it declined the advisory question and stuck to facts, though it won't solve my fund-comparison dilemma."

4. Next time an instalment looks stuck, what would you do?: "Check the 3-step tracker, verify the timestamp, and wait 4 working days (or 6 before contacting support)."

5. Compared with your own app, what did this make easier, if anything? What was missing?: "It makes seeing your monthly consistency—and separating 'holding old units' from 'actively contributing each month'—much clearer. What's

missing for someone like me is benchmark or peer return context, though I get that's outside the scope of a payment passbook."

6. Say Groww sent you a message right after your bank's SMS, saying where the money is, with a link to that month. What would you do with it?: "I probably wouldn't tap it unless a payment actually failed, since I already expect the T+2 delay."

Memories and Ask a friend (Only if found on their own)

Did tester find 'Add a memory' or 'Ask a friend' on their own?: "Yes — noticed 'Add a memory' on the October card while scrolling the Passbook in Section 3, glanced at it, and asked what it was."

- **What do you make of that?:** "It's a note field for that month's instalment. Seems okay if you want to write down why you paused or changed an amount, though it feels a little soft for a finance app."
- **Would you use it? When?:** "Maybe once—like noting 'Started small-cap SIP for 3 years' in June so I wouldn't forget my horizon, or noting why I cancelled in September, but I wouldn't use it every month."

Results Sheet (Feeds Slide 8)

Summary counts (reported as counts out of 4, never percentages): Overall sentiment mix: 2 strongly agreeable (P03, P02), 1 slightly confused on minor details but likes the Passbook & tracker (P04), 1 neutral/pragmatic (P06). Task counts: 4 of 4 found last month's status in their own app (1 of 4 checked the main portfolio screen first before digging into payment history); 4 of 4 succeeded on T1, T1 follow-up, T2, T3, and T5; 3 of 4 rated T4 fully useful and 1 of 4 rated it partly useful (wanted fund-switching advice, which was declined); 0 of 4 would contact support after seeing the Passbook; 3 of 4 found 'Ask a friend' or 'Add a memory' on their own; 0 of 4 felt pressured; 0 of 4 read anything as advice.

Table 1: Baseline & Task Completion (Yes / Partly / No, Seconds, Confidence 1-5)

Tester	Baseline: found last month's status in own app?	T1 (Nov ₹2,000 tracker)	T1 follow-up (T+2 / 4d / 6d rule)	T2 (May failed, window closed)	T3 (Sep ₹2,000 returned 12 Sep)	T4: question · badge · useful?	T5 (Change AutoPay bank)
P03 (P03) [Agreeable]	Yes, 25s, conf 5/5 (Oct 5 done; checks SMS + history)	Yes, 19s, conf 5/5 (No support)	Yes, conf 5/5 (T+2 normal, up to 4d, support >6d)	Yes, 24s, conf 5/5 (No support)	Yes, 22s, conf 5/5 (No support)	"Why is my current value less than what I invested..." · Standard answer · Yes (42s, conf 4/5 — noticed 5-6d vs T+2 mix)	Yes, 18s, conf 5/5 (No support)
P04 (P04) [Slightly Confused]	Yes (after wrong screen), 39s, conf 4/5 (Sep/Oct failed; Aug 10 last paid)	Yes, 28s, conf 4/5 (Briefly confused why debit was 4 Nov for 5 Nov SIP; No support)	Yes, conf 4/5 (T+2 normal, up to 4d, support >6d)	Yes, 31s, conf 4/5 (Looked for disabled Pay Now button; No support)	Yes, 27s, conf 4/5 (Wanted reason why order wasn't accepted; No support)	"My last two SIP payments failed..." · Checked · Yes (44s, conf 4/5 — expected action button inside chat)	Yes, 26s, conf 5/5 (Checked Passbook first, then Next steps; No support)
P02 (P02) [Agreeable]	Yes, 26s, conf 5/5 (Oct), 4/5 (Nov) (Checks SMS + total)	Yes, 16s, conf 5/5 (No support)	Yes, conf 5/5 (T+2 normal, up to 4d, support >6d)	Yes, 19s, conf 5/5 (No support)	Yes, 17s, conf 5/5 (No support)	"Why does my SIP return (-2.91%) look so different from the fund's 1-yr chart?" · Standard answer · Yes (39s, conf 5/5)	Yes, 14s, conf 5/5 (No support)
P06 (P06) [Neutral]	Yes, 20s, conf 5/5 (Cancelled Sep 15; Sep 5 last paid)	Yes, 15s, conf 5/5 (No support)	Yes, conf 5/5 (T+2 normal, up to 4d, support >6d)	Yes, 17s, conf 5/5 (No support)	Yes, 16s, conf 5/5 (No support)	1) Switch funds? · Declined 2) Existing units on cancel? · Checked · Partly (46s, conf 5/5 — good for rules, not fund choice)	Yes, 15s, conf 5/5 (No support)

Table 2: Reactions to Passbook, Delivery Tracker, Memories/Ask a Friend & Guardrails

Tester	The three steps mean...	Reminds them of...	Delivery words or bank words?	Source and time: more trust?	Most wanted in Groww	Found memory or Ask a friend themselves?	Felt pressure?	Read as advice?
P03 (P03) [Agreeable]	Money left bank -> Groww sent order to	Swiggy or Amazon order delivery tracker	Delivery words ('Picked up, handed to	Yes — proves it tracked her exact payment,	3-step delivery tracker on each month's	Yes — found 'Ask a friend' on May card	No (0 of 4)	No (0 of 4)

	fund -> Units landed in my name		fund, delivered')	not a generic screen	payment	(would send to college friend)		
P04 (P04) [Slightly Confused]	Bank deduction -> Order sent to mutual fund -> Units credited to account	Flipkart or Amazon parcel tracking	Delivery words for quick reading, bank words for statement check	Yes — looks like real system logs rather than a dummy status screen	Monthly passbook scroll with 'last confirmed' date & clear failed months	No — did not notice or tap either unprompted	No (0 of 4)	No (0 of 4)
P02 (P02) [Agreeable]	The 3 handoffs between bank debit, fund house order, and unit allotment	Courier or Amazon delivery stages	Delivery words as primary (makes 2-day wait feel normal), bank words secondary	Yes — acts as a real audit trail with exact timestamps	Monthly passbook scroll combined with Sensecheck	Yes — found 'Ask a friend' on May card (shares status without ₹ balance)	No (0 of 4)	No (0 of 4)
P06 (P06) [Neutral]	Standard settlement flow: mandate debit -> AMC order -> unit allotment	Amazon or Swiggy delivery tracker	Neutral — fine with bank terms, agrees delivery words help beginners	Somewhat — good transparency, though he already understood T+2	Single-scroll Passbook showing active/stopped habit + Next steps options	Yes — noticed 'Add a memory' on October card (lukewarm; maybe use once)	No (0 of 4)	No (0 of 4)
